18.15-20.00

Welcome reception and honours for recent MA graduates

(savoury snacks and drinks will be provided)

Additional event: Library and Research Support

“Doing library research: Catalogues, databases, full-text platforms and search strategies”

Dr. Martin Mehlberg, SuUB Bremen, Fachreferat Anglistik
January 12 & 13, 2023, 2-4 pm; SuUB Bremen, Schulungsraum1

Library research is an integral part of all research projects, including seminar papers and MA theses. In this session we look at some efficient research strategies. Topics covered are:

- researching the library’s collection (How to access a particular (e-)book or (e-)journal?)
- finding Green Open Access articles
- understanding the search syntax of databases (operators, wildcards).

An overview of different types of search tools for compiling your bibliography of secondary sources on a certain topic will be given as well:

- bibliographic databases (in particular MLA International Bibliography)
- subject-specific meta search engines
- full-text platforms (e.g. JSTOR).
